LogiLink USB-C charger, 30 W, GaN, 1-port, 1x USB-C (PD), Slim Version, White:

Thanks to GaN (Gallium Nitride) technology, this charger enables a significantly higher power density compared to conventional silicon-based models. This means it can transfer more energy in less time without overheating. With its USB-C connection, the charger is compatible with a wide range of devices, including smartphones, tablets, laptops, and even gaming consoles. The support for PPS (Programmable Power Supply) ensures that the charger automatically determines the optimal charging speed for each device. The USB-C GaN charger features multiple protection mechanisms to safeguard both your devices and the charger itself. Overcurrent, overvoltage, overheating, and short-circuit protection ensure a safe and reliable charging experience.
